Human Ecology, Vol. 3, No. 4, 1975

Author Index to Volume 3

Acheson, J. M., 183-207
Amiran, D. H. K.,* 215-217
Ammerman, A. J., 219-233

Barkley, P. W.,* 67-69
Beals, A. R.,* 213-215
Bicchieri, M. G., 136-138
Bushnell, J. H., 299-301

Chatterjee, L., 133-135
Clawson, M.,* 133-135
Cloak, F. T., 161-182
Crosby, A. W., Jr.,* 294-295
Culbert, T. P.,* 291-294
Cunnea, P. E., 66-67
Curtin, P. D., 294-295

Dickinson, T. E., 67-69
Downs, R. M.,* 287-289

Foster, H. D., 289-291
Frank, P. W.,* 61-65

Graves, I. L., 105-130

Hall, P.,* 133-135
Hardesty, D. L., 71-85
Hardin, G.,* 299-301
Hess, W. N.,* 289-291
Holcomb, B., 287-289
Huang, T.-C., 235-247

Johnston, R. F.,* 61-65

Klein, D. R., 138-140

Lofland, L. H., 131-133

Mandelbaum, D. G.,* 296-299
Meek, R. L.,* 66-67
Michener, C. D.,* 61-65
Murton, B. J., 213-215

Oppenheimer, J. R., 105-130

Pasteur, G., 61-65
Poffenberger, T., 296-299

Seckler, D. W.,* 67-69
Sever, L. E., 43-57
Sewell, W. R. D., 289-291
Sills, D. L., 1-41
Smith, C. E., Jr.,* 209-211
Smith, C. L., 211-212
Smith, R. A., 143-160
Snead, R. E., 215-217
Stea, D.,* 287-289
Steinhart, C. E.,* 138-140
Steinhart, J. S.,* 138-140
Stewart, P., 59-60
Straayer, J. A.* 66-67

Tuan, Y.-F.,* 131-133
Turner, B. L., II, 291-294

van Dresser, P.,* 211-212
VanStone, J. W.,* 136-138

*Asterisks indicate authors of books reviewed in this journal.

Wilson, A. W.,* 215-217
Young, F. W., 235-247

Human Ecology, Vol. 3, No. 4, 1975

Subject Index to Volume 3

Agricultural involution, 237
Antibodies, for influenza virus, 110-111, 119-120
Athapaskan people, 136-138

Behavior
  and "instruction" defined, 163
  study of, by ethologists, 162-163

Carrying capacity, 222-226
  and the logistic model of population growth, 224
  complexity and, 225, 226
  defined, 222-224, 226
  limitations of concept, 225
Census of small populations, 89-94 (*see also* Demography)
  systematic error in, 89-93
Central nervous system malformations, 52-55
  and maternal zinc deficiency, 52-55
  areas of high incidence, 54
Coastal deserts, 215-217
Cohesion, measurement of, 143-160
  multidimensionality and, 145-148, 153-156
  questionnaire, 158
  types of variables, 148-149
  unidimensionality and, 153-156
Common property resources, 183-184, 205-206 (*see also* Territorial organization)
  "harbor gang," 187-189
  inshore fishing rights, 187
Communication(s)
  mammalian olfactory, 61
  stress, 63
Cultural ethology, 170-182 (*see also* Ethology, Culture)
  and anthropology, 174-177
  and experimental psychology, 177
  and human ethology, 172-173
Cultural ethology *(cont'd)*
  genetics and, 165-166
  research in, 177-180
  survival value, 171-172
  theory, 177-179
Cultural instructions
  defined, 167
  transmission of, 167-169
Culture, meaning of, 167-168 (*see also* cultural instructions, Ethology, Cultural ethology)

Demographic stochasticity, 89-90, 99, 227-228
Demographic theory, 87-103
Demography (*see also* Census of small populations, Model life tables)
  and related fields, 87-88, 101-102
  census and data management, 89-94
  hunter-gatherer, 219-233
  late Pleistocene, 219-233
Drosophila ecology, 63

Ecological niche, *see* Niche
Ecology movement, impact on conservation movement, 4-5
Economic growth, 67 (*see also* Ideology, Social stratification)
Environmental movement, 1-41
  and alarmism, 9-10
  and capitalism, 33-34
  and discrimination against the poor, 31-32
  and food supply, 12-13
    Green Revolution, 12-13
  and natural resources, 10-12
    Limits to Growth, 12, 13, 19, 20, 21, 24
  and pollution, 13-14
  and population, 14-16
    growth rates, 14-15
  and "preservationists" (*see also* Ideology)
  and problems emphasized by, 29-31
  and the poor nations, 34-36

Environmental movement *(cont'd)*
and "utilitarians" (*see also* Ideology)
as outgrowth of conservation movement, 4
membership in, 26-29
political critique of, 26-36
Environmental stochasticity, 228-229
Equilibrium, 220-222
Ethological methods, 179-180
Ethology, 162-166 (*see also* Cultural ethology, Cultural instructions)
acquisition of "instructions," 165-166
behavior, 162-163
defined, 162
"instruction," 163, 164

Frosts, 249-273 (*see also* Migration)
and agricultural mounding, 252-255
and Famine Relief Program, 250-251
and land rights, 259-262
cultivation techniques, 257-259
garden topography, 257-258

"Harbor Gang," *see* Common property resources, Territorial organization

Ideology
and environmental crisis, 1-3, 66
of environmental movement, 16-26
"preservationists," 2
"utilitarians," 3
views of man, 18-19
economic growth, 24-26
nature, 22-24
society, 20-21
India
human viruses in animals, 105-130
village life, 213-215
Irrigation agriculture, 141
Irrigation facilities
and social organization, 235-247
measurement of, 238-240

Land use, 134-135
policy decisions and, 153-156, 157-158
watershed-based development, 211-212
Limit cycle, 229
Lobster(s), 183-207
stock density, 201-212
fishermen, 183-207

Maine, 183-207
conservation, 186-187, 196-197
lobster industry, 184-187
lobstering capabilities, 195-196
territoriality, 184, 205-206
Maya, Lowland, Classic civilization, 291-294
Migration (*see also* Model life tables)
and exchange activities, 266-267
and exchange commodities, 264-267
as response to frost, 262-267
population fluctuations and, 230
Mineral cycling, 61
Model life tables, 90-92, 92-94 (*see also* Demography)
assessing fit of, 99-101
fitting of, 92-99
migration and, 93-94
missing infant data and, 92-94
"stable population," 94-95
Mounding (agricultural technique), 252-255
and frosts, 252-255
and sweet potato (*Ipomoea batatas*), 252

Natural hazards, *see* Frosts
Natural selection, 169-170
Neighborhood cohesion (*see also* Cohesion, measurement of)
defined, 145
emphasis on, 144
formation of, 156-157
literature, review of, 149-153
residents' behavior, 156-157
New Guinea, 249
Enga location, 252, 256
Niche
analysis and "cultural species," 74
shape, 72-73, 75-77
theory, 62, 71-85
width, measurement of, 74 (*see also* Subsistence variety)
width variability, 82-85
Nutrition, 44-57 (*see also* Zinc)
caloric level intake, 210

Pesticide resistance, 62
Population density, 275-286
carrying capacity and, 222, 223, 224
hunter-gatherers and, 220
lobsters and, 201-202
social pathology and, 275-286
Public regulation, 186-187 (*see also* Territorial organization)

Salinity tolerances, 63
Santa Barbara oil spill, 138-140
  oil industry's role in, 138-140
Seasonality, 185 (*see also* Subsistence variety)
Sedentarization, 270
  and postcontact development in New Guinea, 271-272
  as result of plant introductions, 269-270
Serotype diversity
  calculation of, 110
  Costa Rica, 126
  Phillippines, 126
Skeletal series, demographic interpretation of, 92
Small populations, *see* Census of small populations
Social class, 276-285
  construction of indices for ethnicity and, 276-277, 278-279, 282
  measurement of, 279-280, 282-285
Social pathology, 275-286
  population density and, 275-286
Social stratification
  and economic growth, 25-26, 32
  and environmental ideology, 20-21
Stochasticity, *see* Demographic stochasticity, Environmental stochasticity
Stockholm Conference (1972), *see* United Nations Conference
Structural differentiation, concept of, 237, 246
Subsistence ecology, 71-85 (*see also* Subsistence variety)
  in New Guinea highlands, 257-259
Subsistence variety, 74-82 (*see also* Niche)
  measured by number and importance of resources, 75-77
  spatial variety of resources, 77-78
  temporal variety of resources, 79-82

Taiwan, 235-247
Territorial organization, 183-207 (*see also* Common property resources)
  and public regulation, 204
  boundaries, 189, 192-195
  controls on, 189, 194-195
  economic benefits of, 202-204
  effect on lobsters, 199-202
  "harbor gang," 187-189
  "nucleated" areas, 189-192 (*see also* Lobster stock density)
  "perimeter-defended" areas, 189-192 (*see also* Lobster stock density)

United Nations Conference on the Human Environment (Stockholm, June 1972), 2, 5, 26, 34, 35
Urbanization, 133-135, 211

Viruses
  human, isolation of, 106-107
  in animals, 110-130
  transmission via environment, 106, 122-125
    description of study areas, 107-109

Weather modification, 289-291

Zinc, 43-57
  and growth, 49-50, 51
  deficiency, 48-52
  dietary availability of, 46-48
  human requirements for, 46
  levels in body, 45-46
  metabolism, 44-45
  role in gonadal functions, 49-51
  supplementation, 50
